P.O. Box 609
Topanga, CA 90290 USA
Tel: (310) 455-0980 Fax: (702) 977-3900

Pristine Water Co. utilizes breakthrough technology that brings you the best chlorine-free water purification systems available for pools, spas, whole-house and yard, well-water, fountains, RVs, fresh-water boats, as well as for commercial applications. We provide softer water throughout your property that tastes, smells, and feels like fresh spring water. Our systems are effective, safe, inexpensive and effortless to maintain. Most importantly, they are **free of chlorine, salt, and other toxic chemicals**. They feature a two-month money-back guarantee and a five-year manufacturer's warranty.

Product Advantages

- No More Toxic Chemicals · Health and Beauty Benefits
- Proven Product Track Record · Saves Money Every Month
- De-scaling extends the life of all water-using appliances
- Provides chlorine-replacement sanitizing ion residuals
- Fresh-tasting, odor-free, chlorine-free water to every tap and shower in the house · Replaces bottled water · Reduces pool maintenance · Reduces and prevents scale build-up

No More Toxic Chemicals

Pristine Water's CHLORINE-FREE systems provide a healthy alternative based on electronically produced oxidation and ionization. Our systems generate everything needed to purify and sanitize the water using electrode chambers that are plumbed into your existing lines. In 1994 the EPA raised skin-absorption chlorine to its Top 10 Carcinogens Watch List. Chlorine is used to attack and destroy organic matter such as microbes and algae. However, the chlorine also chemically damages the cells in our bodies, making hair brittle and skin dry and itchy. Why expose your family and friends to the known risks of cancer causing agents? With our systems you will love the taste, smell and feel of your Pristine Water.

Health And Beauty Benefits

A simple way to continuously care for your hair, skin and body is to drink and bathe in water that is free of chlorine. Why waste money and time on expensive beauty treatments and products, when the easiest, most effective thing to do is simply improve the quality of our water?

Proven Product Track Record That Saves Money Every Month

Our primary manufacturer, Chlorine-free Water Systems®, has developed breakthrough technologies not available on any other chlorine-free product on the market today. Our technology is superior to chemical treatment, and we focus on carrying the most effective alternative methods available, because not all "chlorine-free" systems are equal. Water balance is easier to maintain, staining is eliminated, and no chemicals are needed for disinfection. Our systems cost less than \$1 per month in electricity to operate, and offer savings from eliminating chemical additives into the pool. In the whole-house system, because the water is "wetter," less soaps, shampoos, and cleaning solutions are needed. In the yard, less water is needed, and it softens calcified ground. Plants also do better because they don't like chlorine any more than our bodies do.
